DETAILED ACTION

Election/Restrictions

Claims 1-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/10/2006.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stubblefield et al. [US 4,173,746].

Stubblefield et al. discloses an apparatus for cooling a power transformer comprising:

- a storage vessel [12];
- a power transformer [14] having a radiator structure [22]; and
- means for passing cooling liquid from the storage vessel to the power transformer, the means comprising conduit means [28] having at least one spray nozzle [32] for spraying cooling liquid onto the power transformer radiator structure.

Stubblefield discloses a pumping structure [30] for pumping the cooling liquid. Stubblefield inherently discloses a valve.

Stubblefield et al. discloses the instant claimed invention except for the cooling liquid being cryogen.

Art Unit: 2832

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use cryogen liquid for the cooling liquid of Stubblefield for the purpose of improving cooling.

Regarding claim 17, It would have been obvious to one having ordinary skilled in the art at the time the invention was made to include more than one spray nozzles in Stubblefield for the purpose of proving better heat transfer.

Allowable Subject Matter

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
